

PROFILE

Experienced Offshore Handling Systems Engineer with over 7 years of expertise in designing, inspecting, and maintaining offshore handling systems to ensure operational safety and efficiency in harsh marine environments.

SKILLS

- Offshore Handling Systems Design
- Marine Equipment Inspection
- Technical Reporting and Documentation
- Health and Safety Compliance Offshore
- Risk Assessment and Management
- Project Coordination and Team Leadership
- Offshore Operations Optimization
- Knowledge of Marine Engineering Standards

AWARDS

John Doe

Offshore Handling Systems Engineer

WORK EXPERIENCE

Senior Offshore Handling Systems Engineer

Arcadia Marine Engineering Ltd. | 2019-06 - Present

- Lead design and inspection of offshore handling systems including cranes, winches, and loading arms ensuring compliance with industry safety standards.
- Coordinate with marine operations teams to optimize handling procedures and minimize downtime during offshore operations.
- Prepare detailed technical reports and risk assessments to support safe operation and maintenance of offshore equipment.
- Mentor junior engineers on offshore handling system technologies and safety best practices.

Offshore Handling Systems Engineer

Marine Solutions Engineering | 2016-01 - 2019-05

- Conducted inspections and maintenance assessments of offshore handling equipment to ensure operational reliability and safety.
- Reviewed design modifications for offshore handling systems to meet regulatory requirements and environmental standards.
- Collaborated with project and safety teams to address technical challenges and implement process improvements.
- Maintained detailed records and prepared reports for regulatory bodies and client review.

EDUCATIONAL HISTORY

BSc in Marine Engineering at University of Engineering and Technology

2010-09 - 2014-06

Diploma in Offshore Engineering Systems at City Technical College

2008-09 - 2010-06
